

To Our Loyal Customers

As this pandemic worsens, we hope that everyone is safe and healthy. We, as your dry cleaner, are open to support the community in preventing the spread of the virus.

According to World Health Organization, many bacteria, viruses and protozoa are inactivated at 70°C, or 158°F. Although there is no concrete temperature currently set by the CDC for COVID-19, other similar coronaviruses such as SARS and MERS were sterilized at 158°F.

Since household appliances do not reach 158°F (most will go up to 135°F max), professional dry cleaning and laundry are your best defense. Both CDC and WHO acknowledge professional cleaning service which includes cleaning and pressing is effective for most viruses.

If you have any cleaning needs, we are here to serve you. If you want to stay home, we offer pick-up and delivery service for your convenience. If you want to come to the shop, just honk for our curbside service.

We know how important clean clothes can be in this tough time and we will do our best to clean and sanitize your clothes and household goods.

Thank you for your business and support.

Yours truly,

ABC Cleaners
